Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 1-13 are found to be in condition for allowance.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a digital transcoding system for receiving data bit streams with a first bit rate and outputting a data bit stream with a second bit stream wherein to adjust the second bit rate, new DCT coefficients which are to be conducted to a variable length coder are determined with reference to macro-blocks in accordance with the formula:

$$QF_{new}(V)(U) = QF_{old}(V)(U) * qS_{old}/qS_{new}$$

Where qsold stands for the old quantization factors, qsnew for the new ones, and QFold stands for the DCT coefficients at the output of the variable length decoder.

It is noted that the closest prior art of record (Seo et al. US Patent no. 6,208,688) teaches a similar digital transcoding system, however, Seo fails to particularly teach or suggest "adjust the second bit rate, new DCT coefficients which are to be conducted to

a variable length coder are determined with reference to macro-blocks in accordance

with the formula:

 $QF_{new}(V)(U) = QF_{old}(V)(U) * qS_{old}/qS_{new}$ "

as specified in the claims.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
